Bloom Engineering Seminar
Combustion System Design and Application to Industrial Furnaces
October 1-3, 2024 | Hilton Lexington/Downtown • 369 West Vine St • Lexington, KY

Who Should Attend?

- **Plant Managers**
- **Technology Directors**
- **Group Leaders**
- **Plant Engineers**
- **Persons responsible for the operation, design selection and/or maintenance of fuel fired industrial process furnaces and ovens.**

Topics will include:

- **Fundamentals of Combustion**
- **Industrial Burners**
- **Burner Turndown**
- **Combustion Systems Emissions**
- **Typical Burner System**
- **Furnace Controls**
- **Heat Transfer Mechanisms**
- **Heat Recovery Systems**
- **Components**
- **Combustion Safety**
- **Troubleshooting**

The Combustion System Design and Application to Industrial Furnaces Seminar is a 2½ day event offering attendees the chance to learn the latest in combustion technology. Enrollment is limited and registrants will be accepted on a first-come, first served basis.

What Will Be Presented:

Topics presented cover the fundamentals of combustion, energy savings/management, optimizing heat transfer, and combustion safety code requirements. In addition, system design, component function, practical sections on system start up, refractory design options, auxiliary equipment for productivity/energy optimization, and emission management will also be on the schedule. To increase exposure to applicable information, attendees can choose between sections specific to aluminum or steel furnaces during a portion of the seminar.

Registration:
$1,200 per Registrant

The registration fee includes:

- Tuition
- All seminar materials
- Luncheon
- Refreshment breaks

Note: Hotel accommodations are **not** included in the registration fee.
